

Santa Fe, New Mexico, October 22-23, 2009

Pre- Conference Class: 2 Day Course

Thursday October 22

NAHB Member Fee: \$350 Non-member Fee: \$425

NAHB GREEN BUILDING FOR BUILDING PROFESSIONALS

Learn how green homes provide buyers with lower energy costs and higher value. This 2-day course for building professionals discusses strategies for incorporating green-building principles into homes without driving up the cost of construction. You will learn how green homes provide buyers lower maintenance, better indoor air quality, and better long-term value. Techniques are also discussed for competitively differentiating your home products with increased indoor environmental quality as well as energy and resource efficiency. After completing this class and NAHB requirements earn a CGP designation.
